Global. Peer-to-Peer. Skill Based.
Mission Statement

Our primary mission is to develop a cross-platform entertainment suite for esport professionals and regular gamers alike to cultivate new gaming experiences and social interactions.

We aim to provide an environment where gamers can create wagers and compete against one another inside any game.

We operate on the premise that the future of the gaming world will be built using blockchain technologies and monetized via cryptopayments.
The Problems...

- Game developers struggle to find and retain engaged players.
- Player reputation is confined to individual games.
- Difficult for amateur and recreational players to monetize their skills.
...affecting a large market!
Smart Wagers with Ethereum Blockchain

Start Wager
Solution

An entertainment suite designed with the gamers and the developers in mind.

Smart contract based wager application allows for monetization of skills.

A utility token to attract players to new games and set them free of the siloed nature of traditional platforms.
**PLAY Token**: The native token of the Pay2Play ecosystem. The PLAY token grants a player rewards or special features in Pay2Play Partner Games or it can be redeemed at the PLAY Exchange.

**PLAY Power**: The lifetime wins/losses that a player has accumulated. This figure cannot be changed no matter how many PLAY tokens a user may possess at any given time.

**PLAY Exchange**: The goods or services that a player can receive if they decide to redeem their PLAY tokens. Redemption can only take place with Pay2Play, LLC. The PLAY Exchange is still in development and will not be available at launch.

**PLAY VIP**: The specific in-game rewards or special features that a developer will provide to entice players to engage with their game.

**Pay2Play Partner**: Game developers who have partnered with Pay2Play and will offer PLAY VIP based on a player’s PLAY Token balance.

Overview

Wager Process

Wagers are funded using ETH.

Game On!

Player one creates a wager and invites Player two.

Player two confirms and funds the wager.

The winner gets the pot!

Smart Contract

Win or lose, you’ll still get bonus PLAY Tokens!
PLAY tokens are awarded to the winning player after a wager is complete. The amount of PLAY awarded is fixed at 1 win = 1 PLAY.

After each win or loss a player’s “Wins” or “Losses” counter is incremented by 1. This counter is not correlated to the amount of PLAY a user holds at any given point in time.

As a player’s PLAY token balance increases they will receive rewards or extra features in Pay2Play Partner Games called PLAY VIP. Rewards or extra features are determined by the individual game developers. This allows developers to get creative and provide more unique prizes to entice players.

Should a player decide they would like to redeem PLAY Exchange* for an item they can do so. PLAY Exchange are goods or services that players can acquire by trading in PLAY.

When a player trades PLAY for PLAY Exchange their PLAY balance is reduced (not their wins or losses counter). By reducing their PLAY balance, players may lose access to the rewards or extra features in certain games.

*PLAY Exchange is still in development and will not be live at the initial launch.
A bonus structure is available to encourage players to utilize the wager application. If a user makes >3 wagers in 1 day, then 1 win = 2 PLAY for each wager starting at wager #4.

Pay2Play encourages all players to maintain their accounts over a long period of time and engage in the ecosystem. To this end a reward will be granted to players who wager and keep the same account. The reward is given annually on the anniversary of the player’s first wager. Preliminary details of this reward program are outlined below.

\[ \text{Reward} = (80\% \times WL) + (20\% \times N) \]

where:

- \( WL \) = Player’s Win/Loss Ratio (\# Wins/\# Losses)
- \( N \) = Length of time account open in months

**Example**

A player with 10 wins and 4 losses would have a Win/Loss Ratio of 2.5 (10/4). If the same player has maintained their account for 2 years then \( N = 24 \) (12 * 2).

This player’s Reward = 6.8 PLAY \(((80\% \times 2.5) + (20\% \times 24))\)
PLAY

Power

Ensures fair competition

Immutable record

Trustless

PLAYPower is the lifetime record of a player. This stat cannot be changed, except when a player wins or loses matches, and is not directly correlated to the quantity of PLAY held at a given time.

A player can create a new account if they determine they have accumulated too many losses. However, they will lose any PLAY they have acquired and the benefits that come with holding PLAY.

Earned. Not bought or sold

Independently verifiable via blockchain
In-game reward example

The following are for example purposes only.

Each game developer can provide unique rewards as they see fit.

The point is that the more PLAY a player holds, the more they benefit.

How do I attract more players on a small budget?

I’ll become a Pay2Play Partner Game!!
Developer provides in-game reward to players based on PLAY Token level.

Players are motivated to try a new game since they receive an automatic reward.

Developers can be creative with the rewards they offer to entice players.
Partners

Supporting indie game developers who overlook marketing and advertisement so they can focus on quality.

Control heroes and units to destroy your opponent in this real-time competitive experience.
PLAY Exchange are goods or services that players can obtain when they decide to redeem their PLAY tokens. Players must decide if the Exchange is worth the reduction in their PLAY balance as this may cause them to lose PLAY VIP status in Pay2Play Partner Games.

For example purposes only.
PLAY Supply

**Public**
Tokens available to players as a reward for winning wagers.

**Company**
Tokens available to Pay2Play, LLC to use as incentives for partnerships, new team members and promotions.

**Founders**
Tokens available to the founders of Pay2Play, LLC.

**Misc.**
Tokens available for miscellaneous tasks.

**PLAY Token Supply**

- Public: 50%
- Company: 30%
- Founders: 15%
- Misc.: 5%

Total Supply = 1,000,000,000 PLAY
PLAY Token Velocity

Token velocity deals with how quickly tokens are bought and sold, particularly by speculative investors.

The PLAY Token is designed as a utility token and not a speculative investment vehicle.

For this reason, PLAY will only provide true value to those in the gaming community. Holding PLAY will provide unique rewards or special features in Pay2Play Partner Games and allow players to redeem for PLAY Exchange.

For your average investor these prizes will not be enticing and will deter them from acquiring PLAY.

PLAY Token Game Theory

PLAY holders will have to make decisions regarding how they decide to utilize their PLAY.

It is known that to acquire PLAY a user must:
1. Expend time (game play)
2. Risk capital (acquire PLAY via wagering)

It is also known that PLAY carries benefits:
1. PLAY VIP
2. PLAY Exchange

Players must consider their inputs to acquiring PLAY and determine if the benefits of holding outweigh the benefits of redeeming the tokens.

Players must also consider the fact that by redeeming PLAY they may lose access to certain rewards or special in-game features if they drop to a lower PLAY VIP Tier.

Since PLAYPower cannot be transferred, a player who desires to create a new account must determine if it is worth losing all of their stats and starting from scratch before doing so.

Competitive Advantages

Decentralized

Users own their data. Now and forever.

PLAY Tokens

One token. Multiple functions. All improving the experience of the end users.

Community Focused

Gamers and Developers. All are welcome and we all make the platform stronger together.

Roadmap

Q3-Q4 2017
- Concept created
- Development of initial smart contract

Q1 2018
- Pivot to Entertainment Suite
- Begin building social profile

Q2 2018
- Beta launch
- Form partnerships

Q3 2018
- First Pay2Play Tournament
- Form partnerships
- Updates from Beta Testing
PAY2PLAY IS THE ANSWER

A community of gamers and developers working together.

Breaking down the walls between gamer profiles in different games.

Skill-based wagering for your favorite games.
